What is the Drag Racing?

It is an atmosphere of competition on the race track from the measured distance. The main objective of the driver is to be the leader of the competition whereas the loser shall be eliminated each time until the last lap so one driver remains, the winner.

The drag racing is consisted of different levels of competitions.

The club was announced in November 2007 and it hosted the first championship in February 2009.

Under the patronage of H.E. Sheikh Khaled bin Hamd bin Khalifa Al-Thani, the President of the QRC, who embraced the free show sports (the youth's favorite sports).

As he added to it everything related to security and safety whether for the driver or the spectator, especially that this sport might be more dangerous than what the driver and the spectator could comprehend if they practiced it on streets or in public places, where it would threaten their personal safety, harm the people around them leading to their death. For this reason, it is better that the fans of this sports practice it according to the laws we introduced through what H.E. Sheikh Khaled bin Hamad provides.
